FOREWORD

In all flora projects, accurate knowledge of plant distribution is critical in understanding the geographic limits of a particular species, genus or family. Reliable geographic information thus provides the baseline for documentation and mapping of plant distribution patterns, a crucial component in assessing conservation status of species. However, it can be very time-consuming to find coordinates for each particular locality and in some cases the locality where the specimen is reported to exist cannot be found on a modern map, perhaps because it was misspelled or inconsistency between the gazette name and local name. Thus having a gazetteer complete with coordinates is essential to the accurate mapping of plant distribution, which is an important component of the Flora of Peninsular Malaysia Project.

Peninsular Malaysia has a history of botanical collecting that spans over 150 years and during the same time, a vast collection of specimens from all over the Peninsula was accrued. The work of compiling this gazetteer has therefore been a monumental task and includes more than 3,800 localities. I wish to congratulate the authors and their team of botanists for their stupendous and painstaking effort. The Botanical Gazetteer for Peninsular Malaysia is the final volume following the Sabah and Sarawak Gazetteers. With this publication, there is now an up-to-date botanical gazetteer for the whole of Malaysia.

I believe, the information in this gazetteer will provide easier and greater access to the plants in Malaysia for a wider range of researchers, both local and overseas, as well as to managers of natural resources.

Dato' Dr. Abd. Latif bin Mohmod
Director-General
Forest Research Institute Malaysia

ACKNOWLEDGEMENTS

We are sincerely indebted to the staff of Conservation and Biodiversity Informatics Branch, in particular Hazlina Ali and Chan Yoke Mui, for their valuable input. Our heartfelt gratitude to KEP botanists, Lim Chung Lu, Yao Tze Leong, Rafidah Abdul Rahman, Avelinah Julius, Siti Munirah Mat Yunoh and Ummul Nazrah Abdul Rahman for searching the coordinates of old localities. Special thanks are due to Dr. E. Soepadmo and Dr. Peter Wilkie for their critical comments on the gazetteer list. Denis Filer and BRAHMS (Botanical Research and Herbarium Management System) have been invaluable in facilitating data processing. Not forgetting Saripah Barom and Asnah Hashim for their assistance in herbarium specimens databasing.

We would like to acknowledge Forestry Department Peninsular Malaysia for sharing spatial data on forest cover. We are also indebted to the Department of Survey and Mapping Peninsular Malaysia (JUPEM), Malaysian Remote Sensing Agency (ARSM) and Malaysian Centre for Geospatial Data Infrastructure (MaCGDI) for providing topographic data and information about the localities.

This project is funded by the Malaysian Government through its National Council for Scientific Research and Development (MPKSN).

M.Y. Siti-Munirah

Aborigines in Royal Belum State Park, Perak

INTRODUCTION

As the title of the book implies, this gazetteer is botanical in approach and does not attempt to list all named places, geographical or physical features occurring in Peninsular Malaysia. Localities listed are derived from the labels of herbarium specimens lodged in the Herbarium of the Forest Research Institute Malaysia (KEP), the Singapore Herbarium (SING) and those in a wide range of botanical literature, notably Burkill (1927).

Several sources of information have been used to compile this gazetteer. Maps that were consulted include topographic maps produced by the Department of Survey and Mapping Peninsular Malaysia, forest cover maps produced by the Forest Department of Peninsular Malaysia, spatial maps produced by Malaysian Remote Sensing Agency and Malaysian Centre for Geospatial Data Infrastructure and topographic maps published in 1945. The Google Earth website was also helpful.

The book has three chapters. Chapter 1 deals with places while Chapters 2 and 3 cover roads and rivers respectively. For each chapter, fields for coordinate, district and state are provided. Please note that in the state of Perlis, the sub-district corresponds to district in other states and there is no district for Kuala Lumpur.

Maps are provided to show the states and districts, mountain ranges and major rivers.

General Considerations

Alphabetical arrangement. All names are arranged alphabetically. The names used are currently accepted names. For localities in which the main search word may not be obvious (e.g., Tanjong Dendang, P.), it is recommended that a search be undertaken on each word separately.

In the Malay language, it is common for a name to have different spellings. Spelling variants or names that are incorrectly spelled are treated as synonyms and do not have a coordinate. Instead readers are directed to the accepted name/spelling. For example, 'Beremban, G.' in Negeri Sembilan is incorrectly spelled, therefore has no coordinate and readers are directed to 'Berembun, G.'. Another frequent case is the wrongly spelled name of the state of Terengganu (not Trengganu).

A name that is recorded on the specimen label or in the literature but is no longer in use is listed as a synonym. This happens frequently in older collections. By detailed examination of the collectors' itinerary, diaries and book indices, we were able to ascertain the accepted name for a particular locality. (These diaries and indices are lodged in various herbaria and are not published). Such names are, in addition, checked

Table 1: The Abbreviations and Spellings Used in the Index

Abbreviation	Full text/accepted spelling	Old spelling	English
-	Air	Ayer	Water
Bt.	Bukit	-	Hill
-	Genting	Ginting	Pass
-	Gua	Goa	Cave
G./Mt.	Gunung	Gunong	Mountain
RF	Hutan Lipur		Recreational Forest
WR/WS	Hutan Rezab Hidupan Liar	-	Wildlife Reserve/Wildlife Sanctuary
VJR	Hutan Simpan Dara	-	Virgin Jungle Reserve
FR	Hutan Simpan Kekal (HSK)		Forest Reserve
Rd.	Jalan	-	Road
-	Johor		Johore
Kg.	Kampung	Kampong	Village
-	Kem		Camp
-	Kuala	Kwala	Confluence/river mouth
-	Lubuk	Lubok	Pool
-	Melaka		Malacca
-	Pantai		Beach
-	Pos		Fort
P.	Pulau	Pulo, Poolo	Island
Sg.	Sungai	Sungei	River/stream
NP	Taman Negara	-	National Park
SP	Taman Negeri	-	State Park
Tg.	Tanjung	Tanjong	Headland
-	Tasik	Tasek	Lake
-	Teluk	Telok	Bay
-	Ulu		Headwaters

against published accounts. Examples are Batoo Lanshun (Batu Lanchang), Goa Chirita (Cherita, Gua), Poloo Tikoos (Pulau Tikus) and Poolo Remoo (Rimau, P.).

In the modern Malay spelling, some letters, such as 'b' and 'c' are no longer followed by the letter 'h', as, for example, 'Bharu' or 'Baharu' (old spelling) and 'Baru' (modern spelling), 'Cherita' is now spelled 'Cerita' and 'China' spelled as 'Cina'. Other examples include 'Kechil' now 'Kecil', 'Ayer' now 'Air', 'Tasek' now 'Tasik' and 'Gunong' now 'Gunung' and many more. This can be a source of confusion. In most cases, especially for geographic terms, modern spelling is used (Table 1) but in some cases, for legal reasons, the name has not been changed for instance Kota Baharu is not spelled Kota Baru and 'Ayer' and 'China' are not necessarily 'Air' and 'Cina' respectively.

The prefix for place names such as bukit (hill), gunung (mountain), kampung (village) and pulau (island) is attached as a suffix preceded by a comma. Examples are Abi village which appears as Abi, Kg. and Aur which is a forest reserve, a settlement and an island appears as Aur FR, Aur, Kg. and Aur, P. respectively. The abbreviations used in this gazetteer are given in Table 1, which also provides the Malay and English names for geographical terms.

In general the suffix is placed after the name. There are however many instances where what might be considered a suffix is actually part of the name and are therefore listed as such. This is especially true for towns. Examples are Balik Pulau (it does not appear as Balik, P.), Bukit Damansara (not as Damansara, Bt.), Bukit China (not as China, Bt.), Gua Musang (not as Musang, Gua), Sungai Besi (not as Besi, Sg.) and Pulau Tikus (not as Tikus, P.). In cases such as Sungai Udang, the name is listed in full (for town) and as Udang, Sg. (for river). In view of this complexity, users are advised to conduct a search under all parts of the name.

Homonyms. There are many cases where two or more localities have the same name. No special indication is provided if these are sited in different districts or states or is attached with a unique prefix/suffix. For example, Ayer Hitam is a settlement in the states of Johor, Negeri Sembilan, Selangor and Penang and is a forest reserve in Selangor, Johor and Penang. Aur is a settlement in three districts of Pahang; it is also a forest reserve in two Pahang districts and is an island in Johor. As far as the authors are aware, there are no cases of a same name, together with its prefix/suffix, being used for different localities in the same district.

Forest Reserves, rivers, roads, mountain ranges and managed landscapes. For Forest Reserve, the centre-point coordinate is used. Frequently, one will encounter the case where the forest reserve name is preceded by a prefix such as G. or Sg. in a specimen label. Where this is deemed incorrect, the prefix is removed in the index. For example, Gunung (or G.) Panti FR and Sg. Lebir FR should be searched as Panti FR and Lebir FR respectively. However, it should be noted that in several cases, the inclusion of the prefix is correct, e.g., Sungai Buloh FR and Sungai Menyala FR. A forest reserve that falls into two or more districts will each have a centre-point coordinate. There are many cases where the FR and compartment number are given in the specimen label. We are unable to furnish the compartment level data, hence we list only the centre-point coordinate of the Forest Reserve.

For a river, the coordinate of the downstream confluence is used, because, unless specified in the field notes, it is assumed that the collector began the journey from the downstream confluence.

For roads, the column 'Start' refers to the first road name; the column 'End' refers to the second road name. For example, Alor Star–Kuala Nerang Rd., the Start coordinate (6°07'10" N, 100°22'04" E) refers to Alor Star and the End coordinate (6°16'54" N, 100°35'56" E) refers to Kuala Nerang. If a reader is interested in looking for the Kuala Nerang-Alor Star Rd. coordinates, they should use the given coordinates in reverse. Start and end coordinates that lie in different districts and states are noted by a slash (/) in the district and state columns. For example, Cameron Highlands-Gua Musang road begins in the district of Cameron Highlands in Pahang and ends at Gua Musang in the district of Gua Musang in Kelantan. In the case where the specimen label specifies only a single name, the coordinate of the village/town bearing the road name is used. For example, we used the Jemaluang town coordinate for the Jemaluang Road. In the case of Cameron Highlands which covers a very large area, we have used instead the Tapah and Brinchang towns as the beginning and end of the road.

It is reiterated that this gazetteer does not record road and river localities that are not botanical collecting localities. In addition, mountain ranges do not appear in the gazetteer. In cases where a summit is the boundary for more than one district or state, the districts and states are made known.

Managed landscapes such as protected areas and forest reserves may fall in two or more states/districts. For example, Taman Negara lies in the states of Kelantan, Pahang and Terengganu. Entry for each state is given accordingly.

Collectors in the late 19th and early 20th centuries such as Scortechinii and Cantley rarely list the specific name of locality in their collection labels. They merely record the area's generic name and it is very common to find labels with only state or district name. In such cases, the centre-point of the state or district is given.

Finally, we have tried to make the gazetteer as complete as possible but we are only too aware that we may have overlooked localities. It is very common to have wrongly-spelled names particularly in older collections where a name is spelled based on pronunciation spoken by local guides. Very frequently too, the place is recorded in the wrong district and, in the worst case scenario, in different states. These errors are not unexpected as determining one's position in the dense tropical forest is no easy task without the aid of GPS instruments. There are many other instances which eventually result in the locality not being listed. We therefore appreciate readers' feedback in pointing out omissions or corrections. Kindly send feedback to floraonline@frim.gov.my. The gazetteer will be available on the web (<http://www.chm.frim.gov.my>) where it will be periodically updated.

Botanical Gazetteer for **PENINSULAR MALAYSIA**

This botanical gazetteer provides standardised locality names and their coordinates for plants that have been collected in Peninsular Malaysia in the last 150 years. The more than 2,800 localities listed in the Gazetteer are derived from herbarium specimens lodged in the Herbarium of the Forest Research Institute Malaysia (KEP), the Singapore Herbarium (SING) and botanical literature.
